Projects

Destiny Dive

Built a MERN stack application with React frontend, Express.js backend, and MongoDB Atlas database, featuring user authentication (Google OAuth + local), college/university search with advanced filtering, and scholarship application system with PDF generation.

Created responsive admin interface for managing applications, implemented real-time form validation, designed RESTful APIs for CRUD operations, and integrated third-party services for enhanced user experience with modern UI/UX tools like bootstrap.

Stock Market Prediction Using Deep Learning

Developed a stock price prediction website using Python, TensorFlow, and Plotly. Implemented deep learning models (LSTMs/Neural Networks) to analyze historical stock data. Integrated real-time stock search, date range input, and interactive visualizations for user-friendly predictions.
